Vinchin Backup & Recovery V4.0.6

Release Note

2019/02

成都云祺科技有限公司
Chengdu Vinchin Technology Co.,Ltd.

Vinchin Backup & Recovery v4.0.6 – Release Note

Vinchin Backup& Recovery v4.0.6 has updated some new features as below:

Support Virtualization Platforms

Backup for “Huawei FusionCompute”

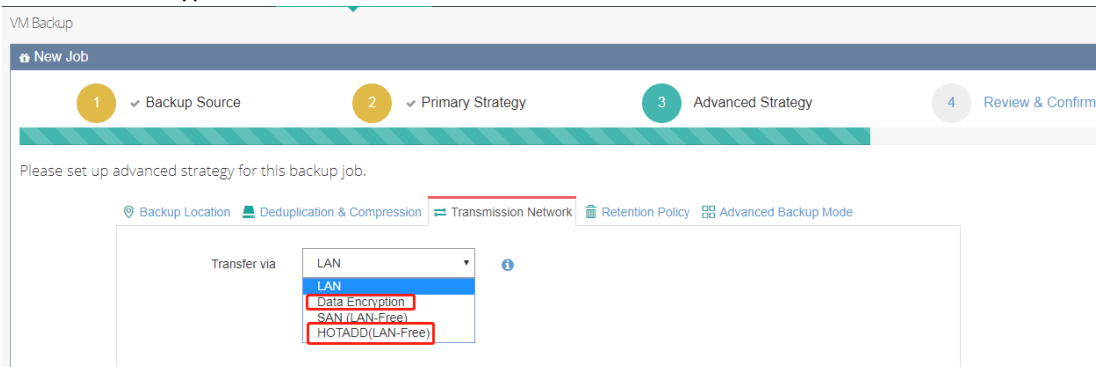

Backup for “OpenStack + LVM”

Backup / Restore Improvement:

1. Support “Data Encryption” and “HotAdd” transmission mode in VMware backup.

Data Encryption: Vinchin uses bank grade AES 256 encryption to encrypt the backup data during transferring via LAN.

HotAdd: Vinchin uses the VMware HotAdd transport mode to attach disks of the running VM to Vinchin backup server when doing backup and restore. Data in the VM is read or written directly from/to the datastore bypass LAN.

2. Support back up VM from GFS2 storage repository on Xenserver 7.6.
3. Support restore VM to Sangfor HCI 5.8 virtual storage.
4. Optimize backup-plugin log info on KVM and XenServer, save storage space by reducing log size.
5. Support configure CIFS parameter when adding CIFS storage.

Add Backup Repository

Backup Repository Configurations

Node IP address/domain * localhost.localdomain(192.168.65.60)

Repository will be mounted to the selected backup node.

Storage Type * CIFS

Select a storage type for the repository

Share Folder * //192.168.67.6/gongxiang

CIFS share folder, e.g. //192.168.1.10/path/directory

Username vinchin.vers=3.0

Username for accessing CIFS

Password *****

Password for accessing CIFS

6. Fixed some system BUGs.
