# VINCHIN Backup & Recovery v6.0

## Release Notes

2020/09

**New Features**

- Snapshot in advance, when backing up multiple VMs, take snapshot of the next VM when the first VM is being transmitted to the backup repository.
- Added new backup infrastructure component, Backup Proxy for VMware vSphere.
- Added RHV and oVirt virtual infrastructure support.
- Forever incremental backup support for all virtual infrastructures except Microsoft Hyper-V.
- Added CBT (Changed Block Tracking) support for Citrix XenServer and XCP-ng.
- Added Backup Archive feature, supported archive storages including on-site archive storage and AWS S3 and Alibaba Cloud storages.
- Multithreading transmission for VM backup/restore jobs, help improving the backup and restore transmission speed.
- Speed Controller and speed limit strategy to protect the production system from network or IO overload.
- Strategy templates for pre-configure backup/restore job strategies, help reducing the system administrating works.
- File backup, support Windows and Linux.
- Manually start backup job of one or multiple VMs out of the VM list in a pending backup job.
- Add local directory to the on-site storage source list.

**Updates**

- Updated base operating system from CentOS Linux 7.3 to 7.7.
- Updated VMware vSphere support to version 7.0.
- Updated oVirt support to version 4.4.
- Updated granular restore feature, support downloading of folders.
- Updated Sangfor HCI API version.
- Updated backup schedule strategy, full backups now can be taken once every week or once every few weeks.
